S.J. Cheng, Chairman and Chief Executive Officer of ChipMOS, said, "The first quarter is progressing as expected and we have achieved month over month improvements. We currently expect these positive trends will continue into the second quarter. Our optimism in our outlook has increased based on the following factors: the improving customer forecasts, increased utilization rates, our long-term contracts with customers, more new customer engagements and increased outsourcing from our customers. In addition, we have a different business model from others focusing on DRAM, LCD Drivers and FPD chipsets, and our take-or-pay policy with our customers under the long-term contracts, which has allowed us to effectively manage our capacity and has led to higher profitability for ChipMOS. Based on current customer forecasts, we currently expect our total net revenue in the second quarter ending June 30, 2005 will be approximately in the range of US\$115 million to US\$119 million, 10% to 13% higher than the first quarter 2005."
