By Order of the Board of Directors,

Dated: July 14, 2008

Dear Shareholders,

Despite the significant downturn in the semiconductor industry in 2007, we generated the highest net revenue and net income in our history. Our net revenue was US\$728 million in 2007, representing a 16% increase from US\$628 million in 2006. Our net income under ROC GAAP increased from US\$65 million (US\$0.95 per basic common share) in 2006 to US\$68 million (US\$0.85 per basic common share) in 2007. Our gross margin was down from 30% in 2006 to 26% in 2007. The decline in gross margin was primarily due to a decrease in capacity utilization rate and the decline in average selling prices for both DRAM and LCD driver back-end services.

The oversupply of DRAM products in the second half of 2007 resulted in significant reductions in the price of DRAM products, which in turn drove down the average prices for our testing and assembly services for DRAM products. Our DRAM back-end average selling prices declined approximately 15% to 20% in 2007. However, net revenue from DRAM testing and assembly services grew by 7% in 2007 compared to 2006 due to strong demand in unit volume. Net revenue from our LCD and other flat-panel display driver semiconductor testing and assembly services business decreased by 10% in 2007 compared to 2006, primarily as a result of the weak demand for LCD and other flat-panel display products in 2007, which in turn led to decreased capacity utilization rates as well as decreased average selling prices for our services. In 2007, net revenue derived from flash testing and assembly services totaled US\$172 million, representing a 79% growth compared to US\$96 million in 2006. Net revenue from flash business grew significantly mainly because our business under long-term agreements with our strategic NOR flash customers ramped up, and we successfully developed business with certain new customers located in Taiwan and other countries. In 2007, net revenue derived from flash testing and assembly services accounted for approximately 24% of our total net revenue, and we currently plan to increase net revenue from flash business to approximately 30% of our total net revenue in 2008 and maintain such percentage going forward to diversify our product mix.

In 2007, our capital expenditures reduced by US\$297 million from US\$485 million in 2006 to US\$188 million in 2007, and generated free cash flow of approximately US\$105 million. The improved cash flow made our net debt to equity ratio reduced significantly from approximately 81% as of December 31, 2006 to approximately 72% as of December 31, 2007.

To streamline the ownership structure of ChipMOS TECHNOLOGIES INC. ("ChipMOS Taiwan") and to maximize return on investment for our shareholders, we purchased all equity interest in ChipMOS Taiwan not owned by us through a share purchase and subscription transaction with ChipMOS Taiwan and Siliconware Precision Industries Co., Ltd. in March 2007 and a share exchange transaction with ChipMOS Taiwan in September 2007. With improving fundamentals quarter over quarter, we believe it will gradually support our valuation and make our market cap more in-line with our performance.

Looking into 2008, we experienced cyclical downturn in the end-markets of both DRAM and LCD driver products in the first half of 2008. The market visibility for DRAM products remains limited. However, with the introduction of new 1Gbit DDR II products by some of our customers in May and June 2008, we currently expect that the back-end demand for DRAM products, particularly for testing services, may gradually come back in the second half of 2008. The LCD driver business recovered moderately in the second quarter of 2008 compared to the first quarter of 2008 mainly due to higher demands for LCD and other flat panels. We have seen the sign of LCD driver business recovery in the second quarter. Based on the increasing driver IC demand in the second quarter of 2008 and customer forecasts, we currently expect a 10% or more increase in the sales volume of our LCD driver business in 2008 compared to 2007. In addition, we continue to benefit from certain long-term agreements with our NOR wafer test customers,

which enable us to maintain higher capacity utilization rate for and more steady revenue from NOR wafer test business compared to other products. Net revenue generated from flash testing and assembly services accounted for approximately 32% of our total net revenue in the first quarter of 2008. We currently expect our revenue from flash business to remain stable as a percentage of our total revenue in the second quarter of 2008 and going forward, based on good business developments with Taiwan and US customers.

We intend to remain conservative with capital expenditures in 2008 and focus on equipment upgrade and capacity maintenance rather than capacity expansion. With US\$34 million of capex, we generated US\$21 million of free cash flow in the first quarter. This proceed was used to reduce our debt level and bring down our net debt to equity ratio from 72% in Q4 07 to 70% in Q1 08. We will continue to strengthen our financial structure quarter over quarter and get us ready for the next industry recovery.

On behalf of the Board of Directors, we would like to extend our sincere appreciation to our shareholders, employees, customers and business associates for their continued support over the years.

Sincerely
Shih-Jye Cheng
Chairman
