Name: S. J. Cheng

Title: Deputy Chairman & Chief Executive Officer

EXHIBITS

Exhibit Number

- 1.1 Interim financial statements as of and for the six months ended June 30, 2003 released by ChipMOS TECHNOLOGIES INC., our 70% owned subsidiary on August 31, 2003

ChipMOS TECHNOLOGIES INC.
Financial Statements for the Six Months Ended
June 30, 2003 and 2002
Together with Independent Auditor's Report

Independent Auditor's Report

August 21, 2003

The Board of Directors and the Shareholders
ChipMOS TECHNOLOGIES INC.

We have audited the accompanying balance sheets of ChipMOS TECHNOLOGIES INC. as of June 30, 2003, and the related statements of income, changes in shareholders' equity, and cash flows for the six months then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. The financial statements of ChipMOS TECHNOLOGIES INC. as of June 30, 2002 were unaudited and presented solely for comparative purpose.

Except as discussed in the following paragraph, we conducted our audits in accordance with Regulations for Auditing of Financial Statements by Certified Public Accountants, and auditing standards generally accepted in the Republic of China. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As mentioned in Note 9 and Note 24 to the financial statements, the carrying values (net of credit balance) of the entire investments accounted for using the equity method amounted to \$763,530 thousand as of June 30, 2003, and the related investment loss amounted to \$93,266 thousand for the six months ended June 30, 2003, are based on unaudited financial statements of investee companies in the same period.

In our opinion, except for the effect of such adjustments, if any, as might have been disclosed had we audited the financial statements of investee companies as explained in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the financial position of ChipMOS TECHNOLOGIES INC. as of June 30, 2003, and the results of its operations and its cash flows for the six months then ended in conformity with the Guidelines for Securities Issuers' Financial Reporting and accounting principles generally accepted in the Republic of China.

Moore Stephens
Taipei, Taiwan

Notice to Readers

The accompanying financial statements are intended only to present the financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in the Republic of China and not those of any other jurisdictions. The standards, procedures and practices to audit such financial statements are those generally accepted and applied in the Republic of China.

ChipMOS TECHNOLOGIES INC.
NOTES TO FINANCIAL STATEMENTS
(Amounts are in Thousand of New Taiwan Dollars, Unless Specified Otherwise)

1. GENERAL

The Company was incorporated on July 28, 1997 as a joint venture company of Mosel Vitelic, Inc. (MVI) and Siliconware Precision Industries Co. Ltd. (SPII). Its operations, which began on August 12, 1997, consist of research, development, manufacturing, testing, and assembly of integrated circuits. The Company also provides semiconductor testing and assembly services on a turnkey basis, in which the Company purchases fabricated wafers and sells tested and assembled semiconductors to application and system manufacturers.

On January 12, 2001, the holders of an aggregate of 583,419 thousand common shares of the Company executed a Purchase and Subscription Agreement whereby they transferred their shares to ChipMOS TECHNOLOGIES (Bermuda) LTD. (ChipMOS Bermuda) in exchange for 58,342 thousand newly issued common shares of ChipMOS Bermuda. The selling shareholders, who previously held in an aggregate 70.25% of the outstanding common shares of the Company, thus, became the holders of the entire outstanding common shares of ChipMOS Bermuda. As of June 30, 2003, ChipMOS Bermuda owned 70.34% of the outstanding common shares of the Company.

2. SIGNIFICANT ACCOUNTING POLICIES

Basis of presentation

The accompanying financial statements were prepared in conformity with Guide -lines for Securities Issuers' Financial Reporting, Commercial Accounting Law, accounting principles generally accepted in ROC, other relevant laws and regulations.

The Company's significant accounting policies are summarized as follows:

Classification in the balance sheet

A year is used to classify assets/liabilities as current or non-current in the balance sheet.

Cash equivalents

Bonds acquired under resale agreements with original maturity dates of less than three months are classified as cash equivalents.

Foreign-currency transactions

Foreign-currency transactions, except derivative financial instruments, are recorded in New Taiwan Dollars at the rates of exchange in effect when the transactions occur. Gains or losses resulting from the application of different foreign exchange rates when cash in foreign currency is converted into New Taiwan Dollars, or when foreign-currency receivables or payables are settled, are credited or charged to income in the year of conversion or settlement. On the balance sheet dates, the balances of foreign-currency assets and liabilities are restated at the prevailing exchange rates and the resulting differences are charged to current income except those foreign currency denominated investments in shares of stock where such differences are accounted for as translation adjustments under stockholders' equity.

Revenue recognition

Sales are recognized when titles of products and risks of ownerships are transferred to customers, primarily upon shipment.

Short-term investments

These investments are stated at the lower of cost or market value. Costs of investments sold are determined using the weighted-average method.

Allowance for doubtful receivables

Allowance for doubtful accounts is provided based on evaluation of the collectibility of the receivables evaluated based upon the overall financial condition and payment history of the individual customers as well as the age of the receivables.

Sales and allowances for sales returns and discounts

Sales are recognized upon shipment of products to customers. Allowances for sales returns and discounts are provided based on experience; such provisions are deducted from sales and the related costs of products are deducted from cost of products sold.

Inventories

Inventories are stated at the lower of standard cost (which approximates actual weighted average cost) or market value. Market value represents replacement cost for raw materials and net realizable value for other inventories.

Investments in shares of stock

Investments in shares of stock of companies wherein the Company exercises significant influence on their operating or financial decisions are accounted for using the equity method. Under the equity method, the investment are initially carried at cost and subsequently adjusted for the proportionate equity of the Company in the net income or net loss of the investees. The difference between the costs of the investment and the Company's proportionate share in the net assets of the investees at the date of acquisition is amortized using the straight-line method over five years. Such amortization is recognized as a component of "Equity in net income or net loss of investee companies" account shown in the statements of income.

The Company will discontinue its recognition of its equity in the net loss of the investees when the carrying value of the investment (including advances) is reduced to zero. However, in cases where the Company guarantees the obligations or is committed to provide further financial support to an investee company, or if the investee's losses are temporary and evidence sufficiently shows imminent return to profitability in the foreseeable future, then, the Company continues to recognize its share in the net loss of the investees. The resulting credit balances of the long-term investments are presented as part of other receivable from related parties.

Translation adjustments resulting from the process of translating the investees' financial statements into the functional currency of the Company are recorded as cumulative translation adjustments in the statement of changes in shareholders' equity.

The entire amount of the gains or losses on sales to majority owned subsidiaries are deferred until such gains or losses are realized through the subsequent sale of the related products to third parties. The gains or losses on the sales made by the majority owned subsidiaries to the Company are deferred by the Company to the extent of its equity interest in such subsidiaries until such gains or losses are realized also through the subsequent sale of the related products to unrelated parties. On the other hand, the gains or loss arising from the transactions between more than 20% owned investee companies is deferred in proportion to the ownership percentage in the investee company that recognizes the gains or losses until realized through transactions with third parties.

Other investments in shares of stock are accounted for at costs. A decline in value is accounted for as follows:

- a. Stock with quoted market prices. The temporary decline in market values and the reversal of such declines are included in stockholders' equity. However, other than temporary decline in the value of the investment is charged to current income.
- b. Stock with no quoted market prices. A reduction that is other than a temporary decline in the carrying value of the investment is charged to current income.

Cash dividends received in the year the investment is made are accounted for as reduction in the carrying value of the investment while cash dividends received in subsequent years are recognized as investment income. No investment income is recognized on stock dividends received.

The costs of investments sold are determined using the weighted average method.

Property, plant and equipment and non-operating properties

Property, plant and equipment and non-operating properties are stated at cost less accumulated depreciation. Major additions, renewals and betterment are capitalized, while maintenance and repairs are expensed currently.

The initial estimate of the service lives of the property, plant and equipment is as follows: Machinery and equipment, 1 to 5 years; buildings and auxiliary equipment, 1 to 54 years; furniture and fixtures, 1 to 5 years; tooling, 1 to 2 years; transportation equipment, 5 years; and leasehold improvements, 1 to 2 years. The foregoing service lives plus one year to represent the estimated salvage value are used to depreciate the property, plant and equipment using the straight-line method. The carrying value of property, plant and equipment, which were fully depreciated using the foregoing service lives, but are still being used by the Company are depreciated over their remaining estimated service lives.

Upon sale or disposal of items of properties, the related cost and accumulated depreciation are removed from the accounts, and any gain or loss is credited or charged to current income.

Intangible assets

Intangible assets are amortized using the straight-line method over the following periods: Technology know-how, 5 years; technology license fee, and deferred charges, 1 to 5 years; bond issuance cost are amortized using the average method.

Pension costs

Pension costs are recorded based on actuarial calculations. Unrecognized net transition obligation is amortized over 15 years.

Income tax

The Company adopts inter-period income tax allocation method. Deferred income tax assets are recognized for the tax effects of deductible temporary differences, unused tax credits, and operating loss carryforwards and those of taxable temporary differences are recognized as deferred income tax liabilities. Valuation allowance is provided for deferred tax assets that are not certain to be realized. A deferred tax asset or liability is classified as current or noncurrent based on the classification of the related asset or liability. However, if a deferred asset or liability cannot be related to an asset or liability in the financial statements, then it is classified as current or noncurrent based on the expected reversal dates of the temporary difference.

Any tax credit arising from the purchase of machinery, equipment and technology, research and development expenditures, personnel training, investments in important technology-based enterprise are recognized by the flow-through method.

Adjustments of prior years' tax liabilities are added to or deducted from the current year's tax provision.

Income taxes (10%) on unappropriated earnings generated are recorded as expense in the year when the stockholders have effectively resolved that earnings shall be retained.

Derivative financial instruments

Foreign currency forward exchange contracts (forward contracts), entered into for purposes other than trading, are recorded as follows: the differences in the New Taiwan dollar amounts translated using the spot rates as of the contract date and the amounts translated using the contracted forward rates are amortized over the terms of the forward contracts using the straight-line method. At the balance sheet dates, the receivables or payables arising from forward contracts are restated using the prevailing spot rates and the resulting differences are recognized in income. Also, the receivables and payables related to the forward contract are netted and the resulting net amount is presented as either an asset or liability.

The aggregate amount of the foreign currency to be acquired or sold under European option contracts, entered into as hedge of anticipated transactions, is not recorded as assets or liabilities. The amounts received on options written and the amounts paid on options purchased are amortized using the straight-line method over the term of the contract. The gains arising from the exercise of the options or the losses arising from options not exercised are recognized as adjustments to the carrying values when the hedged transaction occurs.

Reclassifications

Certain accounts in the financial statements as of and for the six months ended June 30, 2002 have been reclassified to conform to the financial statements as of and for the six months ended June 30, 2003.

3. PLEDGED OR MORTGAGED ASSETS

The following assets are pledged or mortgaged as collaterals to secure the customs duties obligations, short-term loans, long-term loans and secured bonds of the Company as well as obligations of related companies:

Item	June 30

ChipMOS USA Inc.	(1,000)	(707)
Other long-term investment	(1,733)	—
	<u>(\$ 2,430)</u>	<u>(\$ 365)</u>

Certain changes on the shareholders' equity of Chantek Electronic Co., Ltd. were made due to its long-term investments. The Company made the adjustments on the equity according to its ownership to the respective accounts, which increased capital reserve and treasury stock by NT\$1,057 thousand and NT\$598 thousand; decreased unappropriated earning by NT\$7,210 thousand.

The difference between the costs of the investment on Chantek Electronic Co., Ltd, Thailin Semiconductor Corp. and Advanced Micro Chip Technology Co., Ltd. as well as the Company's proportionate share in the net assets of these investees at the date of acquisition is amortized using the straight-line method over five years.

In 2003, the Company reclassified its long-term investments on Ultima into short-term investment revalued at lower of cost or market value at transferal.

10. PROPERTY, PLANT AND EQUIPMENT

Accumulated depreciation consists of:

	June 30	
	2003	2002
		(Unaudited)
Machinery and equipment	\$7,941,360	\$6,526,506

Syndicated bank loans collateralized by equipment, repayable semi-annually from July 2002 to September 2007, interest at floating rate (4.525% as of June 30, 2003)	500,000	—
Syndicated bank loans repayable semi-annually from November 1999 to May 2003, interest at floating rate (8.25% as of June 30, 2002)	—	532,000
Research and development subsidy loan, collateralized by time deposits in amounts of NT42,450 thousand, repayable quarterly from July 2000 to September 2006, with zero interest rate	41,121	41,095
	<u>2,990,621</u>	<u>1,368,595</u>
Less—current portion	(360,379)	(878,000)
	<u>\$2,630,242</u>	<u>\$ 490,595</u>

The credit lines as of June 30, 2003 and 2002 aggregated approximately \$4,041,121 and \$4,041,095 respectively.

Under the syndicated bank loan facility agreement for the year of 2003, the Company is required to:

- (1) Ensure that ChipMOS Bermuda and SPIL maintain a percentage of direct ownership in the Company of at least 50% of outstanding shares and have control over its operation.
- (2) Maintain certain financial ratio.

Under the syndicated bank loan facility agreement for the year of 2002, the Company is required to:

- (1) Ensure that MVI and SPIL maintain a percentage of direct ownership in the Company of at least 28.8% and 18%, respectively. The Company must notify the banks in writing and get approval in advance in cases where additional shares are issued in connection with an initial public offering of its shares.
- (2) Maintain certain financial ratio.

As a result of the share exchange between the Company and ChipMOS Bermuda, MVI no longer met the required direct ownership in the Company (Note 1). On October 26, 2000, the Company obtained the necessary waivers and consents from its lenders. These waivers and consents eliminated the MVI direct ownership percentage requirement permanently.

16. BONDS ISSUED

The Company on January 26, 2000 issued secured bonds with face value of NT\$1,200,000 thousand. Those bonds are due on January 26, 2005 and bear annual interest at 5.95% that are payable annually.

Under the guaranteed facility agreement for the long-term bonds, the Company is required to:

- (1) Ensure that MVI and SPIL maintain a percentage of direct ownership in the Company of at least 28.8% and 18%, respectively. In addition, the Company must notify the banks in writing and get approval in advance cases where additional shares are issued in connection with an initial public offering of its shares.
- (2) Maintain certain financial ratios.

As a result of the share exchange between the Company and ChipMOS Bermuda, MVI no longer met the required direct ownership in the Company (Note 1). On October 16, 2000, the Company obtained the necessary waivers and consents from its lenders. These waivers and consents eliminated the MVI direct ownership percentage requirement permanently.

17. PENSION PLAN

The Company has a obligation to provide pension benefits to employees starting from the inception of its operation. The Company has established a defined benefit pension plan for all of its regular employees, which provides benefits based on length of service and average monthly salary for the six months period immediately before retirement.

The Company makes monthly contributions, equal to 2% of salaries and wages, to a pension fund that is administered by a pension fund monitoring committee and deposited in its name in the Central Trust of China. The ending balances of foresaid fund were \$70,966 and \$53,313 as of June 30, 2003 and 2002 respectively.

18. CAPITAL SURPLUS

	June 30	
	2003	2002
Additional paid-in capital	\$2,084,757	(Unaudited) \$2,084,757
Long-term equity investment	1,057	—
	<u>\$2,085,814</u>	<u>\$2,084,757</u>

Under the ROC Company Law, all of the capital surplus can only be used to offset a deficit except those generated from donations (donated capital) and the excess of the issue price over the par value of capital stock (including the stocks issued for new capital and mergers, and the purchase of treasury stock). Capital surplus can be transferred to capital as stock dividends distributed to shareholders.

19. LEGAL RESERVE AND UNAPPROPRIATED EARNINGS

The Company's Articles of Incorporation provides that the following may be appropriated, from the accumulated net income after deducting any previously accumulated deficit and 10% legal reserve, subject to shareholder approval: (a) 10% as bonus to employees, (b) not more than 2% as remuneration to directors and supervisors, (c) a special reserve, if deemed necessary, and (d) dividends to shareholders.

These appropriations and the disposition of the remaining net income shall be resolved by the shareholders in the following year and given effect in the financial statements of that year.

The aforementioned appropriation for legal reserve shall be made until the reserve equals aggregate par value of the Company's outstanding capital stock. The reserve can only be used to offset a deficit; or, when its balance has reaches 50% of the aggregate par value of the outstanding capital stock of the Company, up to 50% thereof can be distributed as stock dividend.

20. INCOME TAX

a. Deferred income tax assets as of June 30, 2003 and 2002 consisted of the tax effects of the following:

	June 30

22. SIGNIFICANT COMMITMENTS AND CONTINGENCIES

Significant commitments and contingencies as of June 30, 2003, except those disclosed in other notes to the financial statements, are as follows:

a. The Company leases parcels of land from the Science-Based Industrial Park Administration (SIPA) and the Kaohsiung branch of Economic Processing Zone Administrations, MOEA under several agreements expiring on various dates from 2002 to 2017, but are renewable upon expiration. Annual rentals, which are subjected to adjustments.

Minimum lease payments were as follows:

<u>Years</u>	<u>Amount</u>
2003	\$ 16,738
2004	16,203
2005	15,668
2006	15,668
2007	15,668
2008 and thereafter	156,676
	<u>\$236,621</u>

- b. On April 20, 1999, the Company entered into a semiconductor packaging technology licence agreement with TESSERA INC. Under the agreement, the Company agreed to pay a licence fee of US\$500 thousand and a royalty fee at certain percentage of net sales of certain products. The Company paid the total licence fee of US\$500 thousand (NT\$15,888 thousand) in 1999 and amortized the amount over 5 years using the straight-line method. The Company also shall pay certain additional licence fees within five years if cumulative production and sales quantity of products bearing Tessera Compliant Chip packages do not meet the commitment schedule at a respective deadline as set in the agreement.
- c. The Company has unused letters of credit aggregating approximately USD2,020, JPY1,035,137, EUR81 and USD49, JPY1,345,505 as of June 30, 2003 and 2002 respectively.

23. DERIVATIVE FINANCIAL INSTRUMENTS

The Company had entered into forward exchange contracts for the six months ended, to hedge its exchange rate risk on foreign-currency assets or liabilities and anticipated transactions. Information on the derivative transactions is as follows:

a. European options

The Company expects to pay Japanese yen for its importation of materials, machinery, and equipment. It has entered into foreign currency option contracts with banks to hedge exchange rate risks. As of June 30, 2003, the Company had no outstanding foreign currency option contracts. For the six months ended June 30, 2003 and 2002, the Company realized premium income of NT\$0 and NT\$48 thousand respectively.

b. Transaction risks

- 1) Credit risk. The banks with which the Company has entered into the above contracts are reputable and, therefore, management believes that exposure to credit risks arising from probable default by such counter parties is low.

- 2) Market risk and hedge strategy. The Company is exposed to market risks arising from changes in interest rates on floating-rate long-term obligations and currency exchange rates arising from U.S. dollar denominated accounts receivable, Yen denominated accounts payable and U.S. dollar denominated debt. In order to manage these exposures, the Company entered into forward contracts and swap contracts. The hedging strategy of the Company is to use the changes in the fair value of the derivatives instruments to offset the changes in the fair value of the hedged items. The Company periodically evaluates the effectiveness of these instruments as hedges of its exposures.
- 3) Liquidity and cash requirement. Interest and exchange rate swap transactions requires the settlement of the net interest payable or receivable only. The foregoing cash requirements are not material to the Company.

c. Fair value of financial instruments

	June 30			
	2003		2002 (Unaudited)	
	Carrying Value	Fair Value	Carrying Value	Fair Value
<u>Assets</u>				
Cash and cash in bank	\$ 657,209	\$ 657,209	\$ 605,228	\$ 605,228
Short-term investment	1,551,655	1,386,801	900,343	900,343
Notes and accounts receivable	1,977,692	1,977,692	1,735,757	1,735,757
Other receivable (other current assets)	983,776	983,776	49,877	49,877
Investments in shares of stock (including credit balance)	1,731,427	1,723,388	419,888	419,888
Refundable deposits (including current portion)	14,943	14,943	13,831	13,831
<u>Liabilities</u>				
Bank loans	1,824,749	1,824,749	1,253,741	1,253,741
Commercial papers	—	—	209,584	209,584
Notes and accounts payable	353,517	353,517	332,013	332,013
Other payable	6,607	6,607	3,024	3,024
Payables to contractors and equipment supplies (other current liability)	110,420	110,420	528,247	528,247
Accrued expenses	347,883	347,883	303,497	303,497
Long-term bank loans (including current portion)	2,990,621	2,990,621	1,368,595	1,368,595
Bonds issued (including current portion)	1,200,000	1,200,000	1,200,000	1,200,000
Guarantee deposits received (other current liabilities)	509	509	431	431

Fair values of financial instruments were determined as follows:

- 1) Short-term financial instruments – carrying values.
- 2) Short-term investments – market values.

- 3) Investments in shares of stock – market value for listed companies and net equity value for the others.
- 4) Refundable guarantee deposits – carrying values.
- 5) Long-term liabilities – based on forecasted cash flows discounted at current interest rates of similar long-term liabilities. Bonds payable are discounted at present value, using an annual interest rate of 5.95%. Other long-term liabilities are their carrying values as they use floating interest rates.

The fair values of non-financial instruments were not included in the fair values disclosed above. Accordingly, the sum of the fair values of the financial instruments listed above does not equal the fair value of the Company.

24. ADDITIONAL DISCLOSURES

The following are the additional disclosures required by SFC for the Company and investees:

- a. Financing provided: Please see Table 1 attached;
- b. Endorsement/guarantee provided: Please see Table 2 attached;
- c. Marketable securities held: Please see Table 3 attached;
- d. Marketable securities acquired and disposed at costs or prices at least \$100,000 or 20% of the paid-in capital: Please see Table 4 attached;
- e. Total purchase from or sale to related parties amounting to at least \$100,000 or 20% of the paid-in capital: Please see Table 5 attached;
- f. Receivable from related parties amounting to at least \$100,000 or 20% of the paid-in capital: Please see Table 6 attached;
- g. Names, locations and related information of investees on which the Company exercises significant influence: Please see Table 7 attached;
- h. Transactions of derivative financial instruments: Please see Note 23.

25. SEGMENT FINANCIAL INFORMATION

a. Industry. The Company provides semiconductor testing, assembly, turnkey and TCP services.

For the Six Months Ended June 30, 2003

	Testing	Assembly	Turnkey	TCP	Segment Total	Corporate & Other Assets	Consolidated Total
Revenues from customers	\$ 1,234,480	\$ 1,224,376	\$ 655,045	\$ 674,237	\$ 3,788,138	\$ —	\$ 3,788,138
