Audit Committee

Robert Ma Kam Fook, Pierre Laflamme and Jwo-Yi Miao are currently the members of our Audit Committee. The primary purposes of our Audit Committee are as follows:

- be responsible for the appointment, compensation and oversight of the work of our outside auditors;
- oversee our accounting and financial reporting principles and policies, internal audit controls and procedures, financial statements and the independent audits;
- pre-approve all permitted non-audit services, if any, provided to us by our outside auditors;
- establish our internal complaints procedure; and
- evaluate the independence of the outside auditors.

Our Audit Committee was established on February 28, 2001. Set forth below is the report of the Audit Committee delivered with respect to the financial statements of the Company for the year ended December 31, 2002.

ChipMOS TECHNOLOGIES (Bermuda) LTD.
AUDIT COMMITTEE REPORT

The role of the Audit Committee is to assist the Board of Directors in its oversight of the Company's financial reporting process. The Board of Directors, in its business judgment, has determined that all members of the Committee are "independent", as required by applicable listing standards of the Nasdaq Stock Market. The Committee operates pursuant to a Charter that was adopted by the Board on February 28, 2001, as amended on November 2, 2001. As set forth in the Charter, management of the Company is responsible for the preparation, presentation and integrity of the Company's financial statements, the Company's accounting and financial reporting principles and internal controls and procedures designed to assure compliance with accounting standards and applicable laws and regulations. The independent auditors are responsible for auditing the Company's financial statements and expressing an opinion as to their conformity with generally accepted accounting principles.

In the performance of its oversight function, the Committee has considered and discussed the audited financial statements with management and the independent auditors. The Committee has also discussed with the independent auditors the matters required to be discussed by Statement on Auditing Standards No. 61, Communication with Audit Committees, as currently in effect. Finally, the Committee has received the written disclosures and the letter from the independent auditors required by Independence Standards Board Standard No. 1, Independence Discussions with Audit Committees, as currently in effect, and confirmations from management with respect to non-audit services provided by the auditors, has considered whether the provision of non-audit services by the independent auditors to the Company is compatible with maintaining the auditor's independence and has discussed with the auditors the auditors' independence.

The members of the Audit Committee are not professionally engaged in the practice of auditing or accounting and are not experts in the fields of accounting or auditing, including in respect of auditor independence. Members of the Committee rely without independent verification on the information provided to them and on the representations made by management and the independent accountants. Accordingly, the Audit Committee's oversight does not provide an independent basis to determine that management has maintained appropriate accounting and financial reporting principles or appropriate internal control and procedures designed to assure compliance with accounting standards and applicable laws and regulations. Furthermore, the Audit Committee's considerations and discussions referred to above do not assure that the audit of the Company's financial statements has been carried out in accordance with generally accepted auditing standards, that the financial statements are presented in accordance with generally accepted accounting principles or that the Company's auditors are in fact "independent".

Based upon the reports and discussions described in this report, and subject to the limitations on the role and responsibilities of the Committee referred to above and in the Charter, the Committee recommended to the Board that the audited financial statements be included in the Company's Annual Report on Form 20-F for the year ended December 31, 2002 to be filed with the Securities and Exchange Commission.

Letter to Our Shareholders

Dear Shareholders,

Slowdown of the global economy continued over time with a severe contraction in end market demand for communication and computing applications since 2001. We have prepared ourselves to enhance our structure and business strategies to reduce the damage from these circumstances and to better position ourselves to make the most of our future opportunities.

2002: A Restructuring Year

Beginning from the fourth quarter of 2000 and continuing throughout 2001 and 2002, ChipMOS, like its peers, faced an unprecedented downturn in demand for its semiconductor testing and assembly services. Owing to the weak demand from end-markets and fierce market competition from peers attempting to fill their excess capacity, ChipMOS experienced tremendous pressure on average selling prices for both testing and assembly services. These pricing pressures resulted in average selling prices for testing and assembly services declining by 8% and 16%, respectively, against 2001. While ChipMOS significantly enhanced its capacity utilization through the provision of turnkey services in 2002, the Company recorded total net revenue of US\$188.1 million in 2002 and loss of US\$28 million.

Capacity Rejuvenate and Build up

Through its continuous research and development activities, ChipMOS has equipped its production line with 12” wafer processing capability, COF/COG/TCP packaging and testing technology for LCD driver semiconductor, and the leading testing technology for memory and mixed signal products. For diversifying business model and capability, we invested significant resources together with governmental subsidized research projects to develop packaging and testing technologies for module and sub-system, such as: LCOS module, optical module, COF module, ... etc.

Pursuant to the market demand, we rejuvenated our existing testing memory equipment either by implementing with test options for Flash and SRAM products or by re-modeling for wafer testing. Revenue of testing operation was thus increased even in low DRAM testing demand in 2002. For further expanding our testing services to customers and

reducing market competition, ChipMOS acquired a 41.78% stake in ThaiLin Semiconductor whose core business is on high density DRAM testing located in Hsinchu Industrial Park, Hsinchu, Taiwan.

Our assembly line are enhanced by implementing 12” wafer processing capability for memory products and 3-D packaging based on mini-BGA technology for communication applications. More than that, we also invested significant resources to expand our product categories and capacity via investment 34% stake in CHANTEK ELECTRONIC CO., LTD. The CHANTEK investment enabled us to provide broader package categories at logic, communication and consumer electronic applications. Incorporating with our testing capability, turnkey services are more convincing and attractive to the existing and potential customers.

2003: A growing year

Though 2002 has been marked the beginning of recovery in the semiconductor industry, demand is steadily growing stronger and market prices are stabilizing over time from the fourth quarter. However, ChipMOS sees great promise in the long term potential for subcontracted outsourcing of semiconductor testing and assembly services. In order to reduce the impact of fluctuations in demand, the Company is proactively working to maintain and grow our customer base by continuing to provide quality services and leading technologies to our customers, concentrating on the LCD driver market. In addition to semiconductor testing and assembling, our business will expand to include the manufacture and testing of liquid crystal modules (LCM), liquid crystal on silicon (LCOS) micro-display modules and optical engines.

We would like to personally extend our appreciation to all of our shareholders and customers for their past and ongoing support. Your continued support will encourage all of our employees in their efforts to create more innovative semiconductor testing and assembly technologies that enhance customer value and establish new standards of excellence in semiconductor quality and performance. Our management and employees are deeply committed to improving shareholder value by effectively executing our operational plans, maintaining a strong balance sheet and growing cash flows for the long term.

Future Outlook

ChipMOS is dedicated to developing leading technology, creating value for our

shareholders and providing leading edge solutions that meet the needs of our customers. With our current strategic direction, management expertise and commitment to execution, we are confident we will meet our objectives as we face industry sector challenges in the near future.

Sincerely
