Set forth below is the report of the Audit Committee delivered with respect to the financial statements of the Company for the year ended December 31, 2003.

ChipMOS TECHNOLOGIES (Bermuda) LTD.
AUDIT COMMITTEE REPORT

The role of the Audit Committee is to assist the Board of Directors in its oversight of (i) the Company's accounting and financial reporting principles and policies, internal audit controls and procedures and compliance with legal and regulatory requirements; (ii) the integrity of the Company's financial statements and the independent audit thereof; and (iii) the external auditors, including evaluating the qualifications, independence and performance of and, where deemed appropriate, the replacement of the external auditors. The function of the Audit Committee is oversight. The management of the Company is responsible for the preparation, presentation and integrity of the Company's financial statements and for the effectiveness of internal control over financial reporting. Management and the internal auditing department are responsible for maintaining appropriate accounting and financial reporting principles and policies and internal controls and procedures designed to assure compliance with accounting standards and applicable laws and regulations. The external auditors are responsible for planning and carrying out a proper audit of the Company's annual financial statements, reviewing, if requested, the Company's interim financial statements, annually auditing management's assessment of the effectiveness of internal control over financial reporting (commencing in the first fiscal year ending after April 15, 2005), and other procedures. In fulfilling their responsibilities hereunder, it is recognized that members of the Audit Committee are not full-time employees of the Company and are not, and do not represent themselves to be, accountants or auditors by profession or experts in the fields of accounting or auditing including in respect of auditor independence.

In the performance of its oversight function, the Committee has considered and discussed the audited financial statements with management and the external auditors. The Committee has also discussed with the external auditors the matters required to be discussed by Statement on Auditing Standards No. 61, Communication with Audit Committees, as currently in effect. Finally, the Committee has received the written statement from the external auditors required by Independence Standards Board Standard No. 1, Independence Discussions with Audit Committees, as currently in effect, and confirmations from management with respect to non-audit services provided by the auditors, has considered whether the provision of non-audit services by the external auditors to the Company is compatible with maintaining the auditor's independence and has discussed with the auditors the auditors' independence.

The members of the Audit Committee are not professionally engaged in the practice of auditing or accounting and are not experts in the fields of accounting or auditing, including in respect of auditor independence. Members of the Committee rely without independent verification on the information provided to them and on the representations made by management and the external auditors. Accordingly, the Audit Committee's oversight does not provide an independent basis to determine that management has maintained appropriate accounting and financial reporting principles or appropriate internal control and procedures designed to assure compliance with accounting standards and applicable laws and regulations. Furthermore, the Audit Committee's considerations and discussions referred to above do not assure that the audit of the Company's financial statements has been carried out in accordance with generally accepted auditing standards, that the financial statements are presented in accordance with generally accepted accounting principles or that the Company's auditors are in fact "independent".

Based upon the reports and discussions described in this report, and subject to the limitations on the role and responsibilities of the Committee referred to above and in the Charter, the Committee recommended to the Board that the audited financial statements be included in the Company's Annual Report on Form 20-F for the year ended December 31, 2003 to be filed with the Securities and Exchange Commission.

Letter to Our Shareholders

Dear Shareholders,

The semiconductor industry, especially the sectors we focus on, recovered from the downturn since the second quarter of 2003. This was the result of increased outsourcing by semiconductor manufacturers and improved end market demand due to the improved world economy. At ChipMOS, our focused strategy on building long-relationships in the memory and LCD driver semiconductors markets resulted in a return to revenue and profit growth, with industry leading margins. In fact, the strategy has also positioned us for continued growth through 2004 as we support our customers increased demand forecasts, while at the same time further expanding our presence in the key China market.

2003: A Drilling Year

Owing to the improvement in capacity utilization, our revenue increased significantly in the second quarter of 2003. Our assembly and testing capacity for memory and liquid crystal display (“LCD”) driver semiconductors has been fully utilized since the third quarter of 2003. Due to capacity shortage in the market, we were able to raise the prices on our assembly and testing services for both memory and LCD driver semiconductors in the fourth quarter of 2003, which enhanced our operational margin significantly.

For the full year 2003, ChipMOS reported total net revenue of US\$273.5 million and a net profit of US\$14.6 million.

Market Differentiation Drives Customer Value

In order to compete more effectively, we have tried to differentiate our products and services offerings and capability from our peers since our inception. Based on this philosophy and through our continuous research and development activities, we have successfully developed our own proprietary manufacturing technologies for memory and LCD driver products and equipped our production line with the largest 12 inch wafer assembly capacity and the largest chip-on-film (“COF”)/tape carrier package (“TCP”) assembly and testing capacity in Taiwan. We believe customers will continue to adopt these technologies at increasing rates moving forward based on the numerous performance and cost benefits.

We also diversified into flash memory testing for our memory product services. We believe this will enhance our revenue and margin sustainability to alleviate the impact of the fluctuating DRAM market and to rejuvenate our existing testing memory equipment.

Long-Term Capacity Agreements

Our customers for memory and LCD driver semiconductor services demanded more capacity during the market upturn in early 2003. In order to avoid investing heavily in case of a future downturn, we were hesitant to make further investment without firm order commitments. We were able to enter into long-term supply agreements, whereby ChipMOS has guaranteed capacity through 2005 and 2006 to five major customers, namely, ProMOS Technologies Inc., Novatek Microelectronics Corp., Himax Technologies, Inc., DenMOS Technologies Inc. and OKI Electric Industry Co., Ltd. Currently, 62% of our total existing capacity has been reserved for the above-mentioned customers, with 87% of our existing COF/TCP capacity being reserved.

2004: A Seeding year

Strong demand for ChipMOS to build out a dedicated facility in Shanghai became more apparent as customers aggressively pursued the vast market opportunities in China. Given the incentives offered by the Shanghai government and our current successful business model in Taiwan, we plan to transfer our experience to Mainland China and expand our semiconductor assembly and testing operations there to meet local market demand, especially for the LCD driver semiconductor. Clearly, based on market projects, setting up a local operation in Mainland China is essential to satisfying our customers' growing needs and will be a primary driver of ChipMOS's growth in the years to come.

Future Outlook

We will continue to focus on developing leading technologies, creating value for our shareholders and providing cutting edge solutions to meet our customers' needs. With our current strategic direction, management expertise and commitment to execution, we are confident we will meet our objectives.

Sincerely

Shih-Jye Cheng
Chairman
