Dated: July 8, 2010

Dear Shareholders,

Our net revenue in 2009 was US\$380 million, representing a 29% decline from US\$532 million in 2008. Decrease in revenue was due to the continued global recession in the semi industry resulting from the credit crisis of financial market happened in the second half of 2008. Owing to low utilization of our overall capacity and the declined ASP, our gross margin declined to negative 28.9% for the full year 2009 based under ROC GAAP. Net loss for 2009 based on ROC GAAP was US\$138 million, and US\$1.75 per common share.

2009 was clearly a challenging year for ChipMOS. The global economic situation caused dramatic financial problems at two of our major customers. For most companies, having one customer with such problems would be too much to overcome. I am proud of the ChipMOS team for overcoming the issues brought by both customers and fighting in the face of the overall downturn.

In the past year, we are proud of the numerous steps taken to improve our financial strength. By working with bank creditors and investors we are moving forward in a much better position with the stronger footing needed for long-term success.

Of note, in April 2009, we successfully secured approval from creditors to extend ChipMOS Taiwan's loan repayment. We also restructured our existing convertible bond in September and revised the lease program in November, respectively. These results significantly reduce the cash pressure while our business continues to recover.

We also made good progress in recovering the outstanding receivables from our two major customers who had serious liquidity problems. In January 2010, we entered into an agreement to sell ChipMOS Taiwan's entire Spansion claims to Citigroup at 49.8% discount to the surface value. This claim includes the A/R claim of around US\$70 million and breach contract damage claim of around US\$234 million. So far, we have received US\$34 million from Citigroup for the A/R claim. We made the strategic decision to agree to the discount because it provides us with cash over the near term as opposed to receiving equity for us and needing to cash out at a later point. For ProMOS's outstanding A/R totaled around US\$24.4 million, we have recovered around US\$18.1 million till end of May, 2010 and expect to receive the balance in 9 installments with the last payment due on Mar. 15, 2011.

In the past year, we aggressively worked to fill the capacity left on our books from the loss of two major customers. Our efforts paid off with Q1 revenue up 61% year over year as compared to the same period last year. As you may have seen, our major flash customer, Spansion, successfully emerged from Chapter 11 in May. The new wafer sort service contract signed by Spansion and ChipMOS we announced on April 22 is now effective. We would like to express our sincere congratulations to Spansion for this successful corporate restructuring. As a sole wafer sort service provider for Spansion, we are pleased to maintain long-term partnership going forward and will utilize our existing capacity to fully support Spansion's requirements.

We are optimistically looking into our business plan for year 2010. Despite a shorter number of working days in Q1, our DRAM business achieved around 4% quarter over quarter growth from Q4 last year due to strong demand from both commodity and niche markets. As the worldwide DRAM market remained strong recently, we expect the growth in DRAM business will continue in Q2 and beyond.

The LCD driver business revenue was up 18% quarter over quarter in Q1 compared to Q4 last year. This is a combined result of the market recovery from the quick downturn in Q4 last year and an ASP increase to reflect manufacturing cost. The LCD market outlook for 2010 is becoming clearer. We expect customer demand will remain healthy for the rest of the year. In addition to the strong demand from the market, our LCD driver revenue in 2nd half of 2010 will also benefit from the backend ASP increase in the market and the additional revenue from the capacity we acquired from SPIL. The additional capacity will be brought online in June.

Our flash revenue was down around 14% in Q1 compared to Q4 last year due to market seasonality. Our mixed-signal business also faced the same seasonality issue in Q1 and had a 4% revenue decline as compared to Q4 last year. We have seen a recovery for both our flash and mixed-signal businesses starting from Q2 and expect revenues in both segments to grow significantly starting from Q2.

Overall, we expect continued momentum in our business with strong growth in each of our business sectors in Q2. We are also optimistic in our outlook for the second half based on customer feedback and broader market rebound. We expect our business is capable of maintaining quarter on quarter growth throughout 2010. The growth momentum of our business in the second half would reflect the revenue contribution of the new LCD driver capacity from SPIL and ASP increases. In the testing business, the growth will come from the expected increase in demand from Mask ROM, flash, and niche DRAM.

After completing various steps of financial structuring in the past year, our primary focus is on returning to profitability in 2010. Based on the above-mentioned business highlight, we are confident we can achieve our target.

On behalf of the Board of Directors, we would like to extend our sincere appreciation to our shareholders, employees, customers and business associates for their continued support over the years.

Sincerely,

/s/ Shih-Jye Cheng

Shih-Jye Cheng,

Chairman
